RE: PON #-09-006 - Alternative and Renewable Fuel Infrastructure

Dear Grant Review Officer:

The Monterey Regional Waste Management District (District) is pleased to offer this letter of commitment to partner with the Monterey Bay Electric Vehicle Alliance and Ecology Action in their application to the California Energy Commission for funding in support of the Alternative and Renewable Fuel and Vehicle Technology Program. I am authorized to sign this letter of commitment on behalf of District.

By participating in this program to install alternative fuel and charging stations, the District will have an opportunity to play a key role in the Monterey Bay Area's regional goal to spur acceptance and adoption of alternative-fueled vehicles by installing electric vehicle charging stations.

The District commits to installing four electric vehicle charging stations in the following public locations: District Administrative office and Last Chance Mercantile resale store parking lots at 14201 Del Monte Blvd, Marina, CA. Additionally, we will work with the Monterey Bay Electric Vehicle Alliance to publicize the charging stations and their locations through existing media channels. These locations are highly visible and ideal for the District's ongoing promotion of renewable energy.

The District intends to provide the CEC, upon notice of funding, Board approval for purchase and installation of four electric vehicle charging stations at the locations listed above. The District has the staff expertise to facilitate the installation of the charging stations.

Please give this proposal your full consideration. If you have any questions, please feel free to contact me at (831) 384-5313 or wmerry@mrwmd.org.

Sincerely,

William M. Merry, P.E.
General Manager
