Subject: For Leo Laska, Chair; William Merry, Manger

Hello, Leo,

I hope you will remember me as the representative from first the PBPOA and then the DMFF covering and reporting on the meetings of the CSD for a number of years.

My husband, Morgan Stock, and I decided it was time to learn more about the Monterey Regional Waste Management District--I started to say MRWMD, but that sounded like overkill on initials.

Anyway, I thought before much more time goes by I would write and tell you how very impressed we were with the entire operation. We were on a bus and the narrator was extremely informative and had patience with a lot of the dumb questions that we riders asked. We saw so many operations and I had absolutely no idea that of the extent of cooperative endeavors with other agencies and businesses take place which, of course, is great for everyone. A big hit was the falcon who performed right on cue as well as the recycled rubber and the great potential it has.

As a plus just as Morgan and I were walking up the hill from the Last Chance to the parking lot a very pleasant gentleman came up to us and asked how we enjoyed the tour and we got into quite a nice conversation. I mentioned I knew Bill Gianelli who was at one time the PBCSD representative and the fellow told me it was now under your leadership as Chair and that you are a good one--so I'm passing that along, too. It turned out the gentleman was none other than William Merry, the manager, so he should know! I hope you will tell him how much we appreciated his comments.

I really miss the CSD meetings. I'm still on the PBC Community Advisory Committee and very recently was appointed to the Land Use Committee for our region but somehow, it's not quite the same. I suspect the only person that ever exceeded all the many meetings I attended would be Mark Verbonich, who surely is a candidate some sort of a prize for endurance.

With all good wishes,

June (Duran Stock)

Well, this little memo grew and grew, but I did want to say : "thank you". It was a great experience..
