### **Knowledge of:**

- Civil engineering principles and practices as applied to the field of solid and hazardous waste management, including the planning, development, design, maintenance, construction, and operation of solid waste management landfill, and related waste processing and public works facilities.
- Permitting requirements and processes for solid waste processing and landfill operations.
- Methods of preparing and administering designs, plans, specifications, estimates, and recommendations related to solid waste management, landfill construction and related public works facilities including recycling, waste processing and biogas management.
- Applicable County, State, and Federal laws, codes, and ordinances related to the design, construction, and operation of solid waste management and landfill and processing facilities and related operations.
- Methods, materials, tools, and equipment used in the repair and maintenance of solid waste management, landfill, and related solid waste processing and public works systems.
- Budget development and expenditure control.
- Principles of management, supervision, training, and employee evaluation.
- Research and evaluation methodologies.
- Project Management.
- Sound customer service practices and procedures.
- Safety laws, programs, and requirements related to District operations.
- California Environmental Quality Act (CEQA).

### **Skills:**

- Microsoft Office Suite including: Word, Excel, Outlook, PowerPoint.
- Modern office procedures, methods, and equipment including filing and recordkeeping.
- Proper use of the English language, including grammar, spelling, and punctuation.

### **Ability to:**

- Lead or take substantive part in management discussions with staff and/or outside agencies in the development of programs, procedures, or policy.
- Supervise subordinates in a qualitative and quantitative manner including: hiring, training, evaluation, managing conflicts and team building.
- Comprehend and carry out oral and written directives.
- Interpret and apply District policies.
- Direct District permitting and operations compliance functions with regulatory agencies.
- Provide advice and consultation on engineering problems and requirements.
- Prepare comprehensive technical reports.
- Apply civil engineering principles to a variety of construction, maintenance, operations, and facility improvement problems.
- Collect and analyze data on a variety of technical, analytical, and administrative topics.
- Communicate effectively in writing and during public presentations.
- Manage multiple priorities.
- Promote safe work practices and culture
- Be a good steward of District property and resources
- Plan, organize, manage, and supervise District maintenance and operations functions.
- Provide supervision, training, and work evaluations for assigned staff.
- Inspect and evaluate District construction, maintenance, and installation activities.
- Prepare cost estimates, establish budgets, and control expenditures.

- Direct/Complete a variety of reports.
- Develop recommendations for improving District operations and programs.
- Effectively represent District policies, programs, and services with employees, the public, and representatives of other agencies.
- Establish and maintain cooperative working relationships.
- Effectively represent District policies, programs, and services with employees, contractors, representatives of other agencies, and the public.
- Establish and maintain cooperative working relationships including ability to interact tactfully and courteously with others.

#### **EDUCATION AND EXPERIENCE:**

Any combination of training and experience which would likely provide the required knowledge and abilities is qualifying. A typical way to obtain the required knowledge and abilities would be:

Ten to fifteen (10-15) years of varied and responsible professional engineering work experience in the development, design, maintenance, operation and construction of public works and/or solid waste management and landfill and processing facilities, including some experience in working with compliance and regulatory agencies in addition to possessing a Bachelor's degree in engineering. Master's degree preferred.

#### **REQUIRED LICENSES OR CERTIFICATES:**

- Possession of a current California Driver's License issued by the State Department of Motor Vehicles. Compliance with established District vehicle operation standards, including on-going insurability to drive District vehicles, are conditions of employment.
- Possession of valid and current registration as a Professional Engineer (Civil or Environmental preferred) issued by the California Board of Registration for Professional Engineers and Land Surveyors required.
- MOLO Certification required within 12 months of hire date.

**PHYSICAL AND SENSORY REQUIREMENTS** - The physical and mental demands described here are representative of those that must be met by employees to successfully perform the essential functions of this class. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

**Physical Demands** - While performing the duties of this class, employees are regularly required to sit for extended periods of time to attend meetings and perform desk work; talk or hear, in person, in meetings and by telephone; use hands to finger, handle, feel or operate standard office equipment; and reach with hands and arms. Employees are frequently required to walk around District grounds (uneven surfaces) and stand. Specific vision abilities required by this job include close vision and the ability to adjust focus; normal manual dexterity and eye-hand coordination; corrected hearing and vision to normal range; use of office equipment including computers, telephones, calculators, copiers, and fax machines. May be required to attend meetings after normal business hours. This position requires field work and interacts with the public.

**Mental Demands** - While performing the duties of this class, employees are regularly required to use written and oral communication skills; read and interpret complex data, information and documents; analyze and solve complex policy and operational problems; observe and interpret people and situations; use math and mathematical reasoning; learn and apply new information or skills; perform highly detailed work on multiple, concurrent tasks with constant interruptions; work under intensive deadlines and interact with Board members, all levels of District management, other elected and appointed governmental officials, consultants, contractors, developers, vendors, employees, media representatives and the public.

**Special Demands** - Must be able to actively participate in public meetings including giving presentations in person and on camera before the Board of Directors and members of the public. Work environment may regularly expose the incumbent to such conditions as: regular exposure to noise, dust and unpleasant odors; some exposure to fumes, grease, diesel exhaust, oil and hazardous materials; often works around moving vehicles and equipment; constant contact with staff and the public.

**Work Environment** – Typical office environment on a regular basis and exposure to outdoor conditions as described above..

**ACKNOWLEDGEMENT**

I verify that I have received a copy of the job description and I understand the requirements of this position.
